			<b>295 Total Problems Assigned</b>		
<b>Reader Notes:</b>					
Students need to get 90% of the problems “done” in order to be able to rework their exam.					
“done” means that complete solutions are shown where there are many steps to solving the problem					
so if student just shows answer to the question (like in the back of the book) that isn’t enough unless					
it is just a quick response type of problem					
			Score (rounded to whole number) =	Total Problems “done”	x 100
